## (54) TREATING TANK

(57)Abstract:

PURPOSE: To provide a treating tank capable of efficiently performing necessary treatments and automatizing the treatments, when nucleic acid is hybridized or multiplied.

CONSTITUTION: The treating tank is equipped with a means for charging or discharging a treating fluid into or from the main body 2 of the treating tank and with a means for vertically moving a flexible member 5 installed in the main body 2 of the treating tank. A treating membrane 16 placed between the flexible member 5 and the surface of the treating membrane support can be pushed to the support surface 15 with the flexible member 5.
